Preface	iv
Introduction	v
PART ONE Support: The Key To Operational Success	1-1
Chapter 1 - Supporting Army Operations in Theater	
The Commander's Vision of Support	1-1
Principles for Supporting Campaigns and Major Operations	1-3
Chapter 2 - Theater Organization and Structure	
Theater Organization	2-1
Theater Structure	2-7
The Army in Theater.....	2-10
PART TWO Army Operational-Level Combat Service Support	3-1
Chapter 3 - Responsibilities, Planning, and Support	
Responsibilities	3-2
Planning	3-2
Support.....	3-5
Chapter 4 - Supply, Maintenance, and Field Services	
Supply	4-1
Maintenance.....	4-13
Field Services.....	4-18
Recovery and Evacuation	4-22
Army Oil Analysis Program	4-22
Contracting.....	4-22
Force Reception and Onward Movement and Sustainment	4-24
Chapter 5 - Transportation	
Planning	5-1
Movements Program.....	5-1

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

	Page
Strategic-Level Transportation	5-2
Theater Transportation.....	5-2
Chapter 6 - Personnel Support	
Manning the Force	6-1
Civilian Personnel Management	6-2
Personnel Structure	6-2
Personnel Service Support Functions.....	6-3
Chapter 7 - Combat Health Support	
Initial Combat Health Support	7-1
Joint Combat Health Support.....	7-1
Theater Army Medical Management Information System	7-2
Combat Health Support Functions	7-2
Mass Casualties.....	7-10
Host Nation Support.....	7-11
PART THREE Operational-Level Support	8-0
Chapter 8 - Signal Support	
Battlefield Information Architecture	8-0
Support to Force Projection	8-4
Support to Military Operations Other Than War.....	8-8
Chapter 9 - Operational Intelligence and Electronic Warfare	
The Intelligence and Electronic Warfare Mission	9-1
The Tenets of Intelligence and Electronic Warfare.....	9-2
The Intelligence and Electronic Warfare Force Structure	9-2
Chapter 10 - Civil-Military and Psychological Operations	
Civil-Military Operations	10-0
Psychological Operations.....	10-5
Chapter 11 - Engineer Operations	
Mission.....	11-1
Responsibilities	11-1
Support Functions	11-2
PART FOUR Security and Rear Operations	12-1
Chapter 12 - Military Police Support	
Mission.....	12-1
Support Functions	12-2
Contingency/Force Projection Operations	12-5
Chapter 13 - Air and Missile Defense	
The Air Threat and Joint Synergy.....	13-0
Organization.....	13-1
Priorities	13-1
Air and Missile Defense During Force Projection Operations.....	13-2

	Page
Integrated Operations.....	13-3
Self-Defense Measures.....	13-5
 Chapter 14 - Weapons of Mass Destruction and Smoke Operations	
Weapons of Mass Destruction	14-0
NBC Operations	14-1
Smoke Operations.....	14-5
Contingency Operations.....	14-7
Host Nation Support.....	14-7
 Chapter 15 - Rear Operations	
The Threat.....	15-0
Support Functions	15-0
Battle Command.....	15-1
Bases and Base Clusters.....	15-3
Response Forces	15-4
Tactical Combat Forces.....	15-5
Fire Support.....	15-5
Air and Missile Defense Assets	15-6
Liaison Elements.....	15-7
Noncombatant Evacuation Operations.....	15-8
Reception Operations.....	15-8
Area Damage Control.....	15-9
Host Nation Support.....	15-9
 Appendix A The Defense Industrial Base.....	
	A-1
 Appendix B Logistics Preparation of the Theater.....	
	B-1
 Appendix C The Theater Distribution System	
	C-0
 Appendix D Logistics Support Element.....	
	D-1
 Appendix E Classes and Subclasses of Supply	
	E-0
 Appendix F Digitization	
	F-0
✂ Glossary	Glossary-0

✂ Index.....	Index-1

Preface

The fundamental purpose of the US Army is to support and defend the Constitution of the United States. It does this by deterring war and, if deterrence fails, by providing Army forces capable of achieving victory on and off the battlefield. To accomplish this mission, the Army must maintain trained and ready forces capable of rapid deployment. If deterrence fails, the Army must repel or defeat a military attack and end the conflict on terms favorable to US and allied interests. The ability to accomplish this is based upon sound planning—strategic, operational, and tactical—with support planning as a critical part of each.

This manual provides operational-level support doctrine for Army service component commanders (ASCC), Army forces commanders, and other senior leaders and their staffs employed in joint, combined, or interagency circumstances across the scope of military operations. The ASCC establishes a plan for support of United States corps or other Army operational elements based on priorities established by the combatant commander.

This manual implements relevant doctrine from joint publications, especially Joint Publication 4.0, and is fully compatible with the Army's operations doctrine as contained in FM 100-5, FM 100-7, and FM 100-8. It also links FM 100-10, FM 100-17, and other support doctrinal manuals.

The proponent of this manual is HQ TRADOC. Send comments and recommendations on DA Form 2028 directly to Commander, US Army Training and Doctrine Command, ATTN: ATDO-A, Fort Monroe, VA 23651-5000.

Unless this publication states otherwise, masculine nouns or pronouns do not refer exclusively to men.

introduction

The mission of the United States Army is to deter war and, if deterrence fails, to fight and win. The Army, along with other services, civil agencies, and nations, must be able, when called upon, to defend and promote national and collective security interests throughout the world. The massing of combat power relies on the Army's ability to mobilize, deploy, sustain, reconstitute, and redeploy a crisis response force and reinforcing forces. It must also be able to project forces from CONUS or forward presence locations in response to requirements from the National Command Authorities (NCA). This combat power, in conjunction with joint and/or multinational forces, must have the strategic ability to mass a decisive force or render quick assistance to end a crisis swiftly. Forces will be provided to supported theater combatant commanders and subordinate joint task force (JTF) commanders who are responsible for planning and executing campaigns or operations within their theater and operational areas.

Logistics is the process of planning and executing the movement and sustainment of operating forces in the execution of military strategy and operations. It is the foundation of combat power—the bridge that connects the nation's industrial base to its operating forces. Logistics is basic to the ability of operating forces to initiate and sustain missions across the range of military operations. The threat to our nation will come from many different sources having a wide range of weapons, tactics, training, and political motivation. High degrees of weapon system lethality and mobility can generate devastating losses and require challenging solutions in the areas of doctrine, training, leader development, organization, materiel development, and soldiers.

In such circumstances, the role of logistics and support capabilities at the operational level—to develop and sustain combat power while exercising operational art—takes on even greater importance. Operational-level Army commanders must establish and/or coordinate support functions to allow tactical commanders to focus their attention on the battle rather than on support activities. Support organizations are tailored to support the ASCC's plan in either a mature or immature theater. The theater-of-war base and the theater-of-operations forward operating bases provide both strategic and operational support, respectively, to the tactical support bases.

Operational logistics and support activities support the force during subordinate campaigns and major operations within a theater of operations. Support of the force at the operational level extends from the theater of operations support bases to forward logistics elements and facilities organic to tactical formations. In performing support functions, the theater of operations forward operating bases within the communications zone (COMMZ) link strategic logistics to tactical logistics.

At the operational level, the familiar distinction between *operations* and *support* begins to erode. Planning support is synonymous with operations and becomes a significant undertaking of the ASCC and his staff. Operational support differs from tactical support by the longer planning and preparation time required to sustain extended operations. Support of the force includes balancing current consumption with the need to build up support for

subsequent major operations, lengthening lines of communication (LOC), and staging other combat support and combat service support forward as required to sustain the tempo of operations.

As the commander in chief (CINC) develops his strategic concept of operation, he concurrently develops a concept of support in coordination with his ASCC. CINC's and their staffs consider a myriad of support factors, including logistics priorities, that affect the ability of the operational forces to conduct operations. At the campaign and major operation planning levels, support can be a dominant factor in determining the nature and tempo of operations. Sound support planning and analysis allow for rapid changes to operation plans.

Operational-level leaders must determine the proper balance between centralized planning and decentralized execution of support functions and responsibilities. Too much centralization often results in rigidity and sluggish response, while too little often causes waste and inefficient use of critical resources. Centralizing functions to avoid unnecessary duplication is not always justified. Limited duplication may be beneficial and necessary for adequate flexibility and mobility. However, centralized management and planning prevent optimization of support functions and activities. Decentralized execution is important to carrying out effective planning. Smaller operating units tend to be more flexible and responsive than larger ones. The ASCC's staff helps leaders to focus by providing broad policy direction and coordinating functions both internally within the component and externally with joint, combined, interagency, nongovernment, private voluntary, United Nations, and host nation (HN) agencies.

PART ONE

Support: The Key To Operational Success

As part of a joint team, Army forces are central to the theater campaign. In today's force projection Army, planning and executing major operations to support a theater campaign are formidable tasks. Conditions are increasingly uncertain in a theater strategic environment with ambiguous and ever-widening threats. To assist the unified/combatant CINC in meeting these diverse threats, Army forces offer commanders a range of choices and options for designing theater strategy and campaigns. The challenge to an operational-level commander is to shape the military environment and set the conditions for unqualified success in all major operations. Success means decisive victory or achieving the desired political end state, whether in war or military operations other than war (MOOTW).

Chapter 1

Supporting Army Operations In Theater

Operational tempo toward achieving the CINC's strategic intent is maintained through the simultaneous application of combat, combat support (CS), and combat service support (CSS). The Army operational commander and his staff must develop comprehensive support plans focusing on the capabilities and integration of joint, interagency, and combined assets to achieve the desired operational effect and strategic results. Support at the operational level encompasses the integration of CSS assets, some combat arms organizations, and all army combat support assets in theater according to the CINC's priorities and strategic objectives. This requires the Army operational commander to integrate his allocated resources--communications, intelligence, military police (MP), engineer, civil affairs (CA), psychological operations (PSYOP), nuclear, biological, or chemical (NBC) defense and smoke operations, supply and services, transportation, maintenance, medical, personnel, air defense (AD), and aviation—into his vision of operational battle space in consonance with the theater commander's strategic vision. The support portion of his battle space and the understanding of the higher intent encompass his own area of operations, the theater, and LOC, which will extend back to his rearmost support base but may also encompass the industrial infrastructure.

THE COMMANDER'S VISION OF SUPPORT

Today, the Army contributes to the effectiveness of our nation's responsiveness by maintaining versatile forces organized, trained, and equipped to operate across the entire range of operations in war and MOOTW.

To this end, one of the ASCC's most important responsibilities in theater operational areas on the behalf of the theater commander is to provide his forces joint and multinational force as required with effective and efficient support.
